RUAS Hackathon — Event Report for Potential Sponsors

1. Event Overview

The RUAS Hackathon stands as a premier innovation marathon in Bangalore, bringing together top student talent to solve real-world problems through technology. The RUAS Hackathon, hosted by Build-Ora in collaboration with Rotaract Bangalore, bringing together innovators, developers, designers, and future entrepreneurs for an intensive, high-impact innovation experience.

This year, we expect **350–400 teams** (1,200+ participants) from across India, making this one of the largest student-driven hackathons in the region.

The hackathon will take place at **Ramaiah University of Applied Sciences (RUAS), Bangalore**.

---

2. Theme & Tracks

Participants will innovate across **three major technology tracks**:

1. Agentic AI

Building next-gen AI applications capable of autonomous decision-making, workflow automation, intelligent agents, LLM-powered solutions, and domain-specific AI tools.

2. Internet of Things (IoT)

Hardware-integrated solutions addressing automation, smart city systems, environmental monitoring, mobility innovations, and embedded systems.

3. Sustainable Development Goals (SDG)

Impact-driven projects aligned with global sustainability challenges, including clean energy, waste management, health tech, education, climate tech, and community empowerment.

---

3. Participant Profile

- Students from top engineering and technology colleges across India
- Early-stage innovators and builders
- Experienced developers and designers
- Budding entrepreneurs

Expected Footfall: 1,200+ participants across 2 days.

---

4. Why Sponsor This Hackathon?

High Visibility for Your Brand

Gain exposure to thousands of students, tech enthusiasts, educational institutions, and community partners.

Engage with Future Talent

Connect with developers working on real-world solutions and explore recruitment or internship opportunities.

Support Innovation & Social Impact

Your brand becomes a catalyst for innovation in AI, IoT, and SDG-focused solutions.

Showcase Products or Services

Sponsors can offer product trials, discounts, workshops, or mentorship sessions.

Branding Benefits

- Event banners and stage branding
- Logo on posters, website, and certificates
- Social media promotions
- Booth space at the venue

---

5. Event Structure

Day 1

- Opening ceremony
- Problem statements released
- Coding & prototyping begins
- Mentorship rounds

Day 2

- Final submission
- Judging by industry experts
- Project demos
- Award ceremony

---

6. What We Offer to Sponsors

- Branding across all communication channels
- On-ground presence and product booths
- Opportunity to address participants
- Judge or mentor slots
- Access to participant project reports
- Social media reach via Build-Ora and Rotaract Bangalore

---

7. Expected Outcomes

- 200+ project submissions across AI, IoT, and SDG
- 1,200+ attendees over two days
- Media and campus-wide coverage
- Strong student–industry collaboration

---
